Installing ri documentation for refinerycms-generators-1.0.2...

RDoc failure in lib/generators/refinery_engine/templates/lib/generators/refinery
cms_plural_name_generator.rb at or around line 6 column 4

Before reporting this, could you check that the file
you're documenting compiles cleanly--RDoc is not a
full Ruby parser, and gets confused easily if fed
invalid programs.

The internal error was:

ERROR: While generating documentation for refinerycms-generators-1.0.2

```

```
